B. Removal and installation of temperature dial

Removal

1 Force out clip (63) and the one underneath, pull temperature dial (3) from control unit.

183-19326

Installation

2 Plug temperature dial (3) to control unit and fit both clips.

183-17660/1

C. Removal and installation of blower switch

Removal

- 1 Remove plastic cover (refer to arrow) from control unit, starting at blower switch (5), so that pushbuttons are falling out individually. Push out clip (64).
- 2 Unclip blower switch (5) from control unit and pull off.

Installation

- 3 Press blower switch (5) with clip (64) against control unit, mount plastic cover. Put back push-buttons under slight pressure with a rotating motion (pay attention to sequence and position of symbols).

D. Installing control unit

- 1 Place control unit into holder and tighten with three screws (arrow).
- 2 Plug on 12-pole couplings left and right, as well as lamp sockets for instrument lights.

- 3 Insert holder for control unit from above into cutout and press on (arrow).

- 4 Fasten both screws left and right at top (arrow).
- 5 Clip-in molding for control unit.
- 6 Press-on radio molding.
- 7 Plug-on control knobs of radio.

- 8 Connect battery.
- 9 Check automatic climate control for function.
